

# VOTE ENERGY CANDIDATE QUESTIONNAIRE

To better understand candidates' positions on energy policies, you might want to ask them the following questions:

- 1 Would you choose to support government policies that would allow America's refineries to refine growing domestic oil resources and be internationally competitive?  

---
- 2 Would you support building new energy industry facilities and the infrastructure necessary to safely and efficiently bring energy products to consumers and businesses?  

---
- 3 Would you support updating our energy infrastructure to ensure that Americans have a secure supply of the energy they need?  

---
- 4 Would you stand up against costly federal regulations, such as the onerous Renewable Fuel Standard (RFS) or unattainable National Ambient Air Quality Standards (NAAQS), which can have negative impacts on consumers and the economy?  

---
- 5 Would you oppose increasing taxes that narrowly target America's oil and natural gas industry and, as a result, kill jobs, damage the economy, and hurt consumers?  

---
- 6 Would you support increased access to federal lands and waters for energy exploration and development to improve U.S. energy security?  

---
- 7 Would you support taking full advantage of America's cutting-edge energy production technologies—specifically, horizontal drilling and hydraulic fracturing—that are unlocking vast amounts of domestic shale oil and natural gas resources?
